It's Got to be Coming

Somebody may argue at first sitting in a wheelchair but they'll shut up when they walk off. I don't think he's ever seen this happen to me; you know why because I haven't. I've come a little closer to this with a few interpretations but not, not entirely like him coming firsthand and giving instruction and things; this is new to me so I can't really tell you all that's going on right now except something has got to be coming; It's got to be coming; you better hang on I think, in fact you better get up here for just a minute, can you? I found that when he moved me forward, sometimes it would be an area I hadn't operated in yet, so I had to figure it out; I didn't quite know what was going on till things begin to happen but this is what he's about to do is move you forward; So he can bring the rest to pass; so just hang on; you'll find yourself wanting to go and fast and pray and away; do it when you can. So Father you wanted this you're going to deposit something in the name of Jesus; we thank you, we thank you for it Father in Jesus name give this to her.
