### **You're On Your Way Up**

Prophecy240131b - Wednesday

For some of you, you need to know this – and it's not just one or two, it's those listening and here – that in a certain sense, not you, but the situations around you, you've bottomed out. He's thrown everything that he possibly could at this point. It's not that he's not going to, at another convenient time in the future, try to visit as he does and circumvent. But the God of all grace after that...the God of all grace after that you've suffered a while establish, strengthen, settle, make you perfect. There's an end to this and to these strategic trials. These are coming to a close, He's prophesying to many, and you're on your way up. He's strengthening, settling, establishing.

Hold to the peace, hold to the peace. Don't let it go. Sleep with it, wake up in the middle of the night with it, hold to it like a friend. Clench it in your fist. Snuggle it close to your heart. Know that the witness is true and cannot lie, says the Spirit of Grace. You've come to the bottom and now you're headed up. He thought he was going to kill you or kill those around you, or discourage you to the point of no return. But you're headed up, says the Lord. There are great days ahead. Great days.
